

March, 2003

Dear Los Alamos National Laboratory Participants;

UnitedHealthcare welcomes all UC/LANL participants to utilize our internet website tool, myuhc.com. We are aware that the website is not currently available for some participants who utilize Macintosh Computers and apologize for any inconvenience this has caused. UHC understands that there have been complaints regarding the MAC limitations in accessing the website for some MAC users. UHC is working on a solution that will make myuhc.com available for all MAC users. In the meantime, myuhc.com is currently available for MAC users with an operating system of 9 or 10 and one of the following browsers:

- Netscape 6.2 or higher
- Safari (with a MAC OS 10.3)
- Mozilla 1.6

Please note, all data available on myuhc.com when viewed with any of these browsers is valid and correct.

UnitedHealthcare thanks you for your patience while we continue to enhance myuhc.com.

Sincerely,

United Healthcare
